

Appendix 1

Acknowledgements

Many residents and supporters of the District including community-based organization representatives, school health experts, and members of an ad-hoc multi-agency task force contributed to this project. The persons listed below actively participated in discussions, provided information and comments on earlier drafts, and otherwise offered support to DOH for the completion of this plan. We also consulted informally with parents, advocates, school nurses and other interested groups whose names are not included on this list. We appreciate the support and dedication of all those who participated in this project.
